PROFESSIONAL SUMMARY

First Class Honours Business Intelligence and Data Analytics graduate with experience in transactional banking and digital financial services at FNB Botswana. Experienced in transaction validation, reconciliation, reporting, and resolving payment-related queries. Skilled in Excel, SQL, Power BI, and data analysis, with the ability to identify transaction trends, support operational processes, and improve service delivery within financial environments.

CORE COMPETENCIES

- Power BI Dashboard Development & Data Visualization
- SQL & T-SQL: Data Extraction, Transformation, Reconciliation
- DAX (Data Analysis Expressions) & Power Query
- Data Modeling (Star & Snowflake Schemas, Dimensional Design)
- ETL Concepts & Reporting Automation
- Data Reconciliation, Validation & Data Governance
- Stakeholder Engagement & Business Requirements Analysis
- Banking Analytics: Transactional Data, Customer Profitability, FX Analysis
- Version Control (Git/GitHub) & Cross-functional Collaboration

TECHNICAL SKILLS

BI & Analytics - Power BI • SQL / T-SQL • DAX • Power Query • Data Modeling (Star/Snowflake)

Databases- SQL Server (T-SQL) • Oracle (Foundational) • Excel (Advanced)

Tools & Platforms- Microsoft Visio • Git/GitHub • Figma • Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Business Intelligence Analyst - Banking Analytics

FNB Botswana | 2024

- Designed and delivered interactive Power BI dashboards for cash deposits, POS transactions, eCommerce, and digital banking metrics, enabling real-time performance monitoring across transactional banking units
- Developed SQL queries for data extraction, transformation, reconciliation, and validation from multiple banking systems, ensuring data accuracy and integrity for reporting
- Conducted customer profitability analysis and foreign exchange (FX) commission analysis to identify revenue drivers and optimization opportunities

- Automated recurring reports and eliminated manual reporting processes, improving efficiency and reducing time-to-insight for stakeholders
- Collaborated with business teams to translate requirements into analytics solutions; engaged stakeholders to refine dashboards and reports based on feedback
- Performed data reconciliation activities across banking systems, identifying and resolving discrepancies to maintain data governance standards
- Supported transactional banking operations through validation and analysis of payment transactions across digital channels.
- Performed transaction reconciliation and investigated discrepancies to support accurate reporting.
- Assisted in resolving digital payment-related queries through transaction reviews and system validation.
- Produced daily and periodic reports to support operational monitoring and decision-making.
- Analysed transaction trends across POS, eCommerce, and digital banking channels.

Transactional Banker - eWallet Pro Support

FNB Botswana | 2024

- Supported digital banking operations by resolving transaction-related queries and escalations from customers and internal teams
- Performed transaction validation and reconciliation activities; identified root causes of transaction issues
- Collaborated with product and technical teams to improve customer experience and system reliability

EDUCATION

BSc (Hons) Business Intelligence and Data Analytics - First Class Honours

University of Sunderland (UK) | Botswana Accountancy College

Awarded July 2026

KEY ACHIEVEMENTS

- Developed a suite of 5+ interactive Power BI dashboards currently used by 15+ stakeholders across transactional banking and digital channels
- Automated 3 major monthly reports, reducing manual preparation time by 70% and enabling near-real-time insights
- Identified and resolved critical data reconciliation issues affecting cash deposit reporting; improved data accuracy from 92% to 99%
- Built dimensional data models (star schema) for transactional banking and eCommerce domains, enabling efficient querying and faster dashboard load times

- Designed and conducted knowledge-sharing sessions for non-technical teams on reading and interpreting BI dashboards

ADDITIONAL TECHNICAL PROJECTS

- Data Visualization & UX: Designed responsive dashboard interfaces using Figma; applied UX principles to simplify data presentation and improve decision-making workflows
- Full-Stack Web Development: Built responsive web applications using React.js, HTML, CSS, and JavaScript; integrated with backend systems
- Version Control: Experienced in Git/GitHub for collaborative development and code management

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Power BI Data Visualization Certification
- SQL Server Fundamentals & Advanced Query Optimization (Self-Directed Learning)

CORE SOFT SKILLS

- Analytical Thinking: Ability to break down complex business problems and translate them into technical solutions
- Problem Solving: Demonstrated ability to identify root causes, troubleshoot data issues, and implement effective solutions
- Stakeholder Engagement: Skilled at gathering requirements, presenting insights, and influencing decision-making through data storytelling
- Attention to Detail: Meticulous approach to data validation, reconciliation, and quality assurance
- Fast-Paced Delivery: Comfortable working in dynamic environments with tight timelines and competing priorities
- Cross-Functional Collaboration: Effective team player with experience working across banking, technical, and business teams
